IT COMMITTEE ANNUAL REPORT

FEBRUARY 2018

Advancing CSPA mission and objects through technology…

Fellow Participants

INTRODUCTION

Another year has passed and we've continued the theme of steadying the CSPA technology assets. Overall everything is in good order, but we have some ongoing and longer need projects – we will break these down in greater detail within this report.

I would like to thank both Paul Gamble and Charlene Kerr for assisting in some of our technological needs over this past year. I look forward to continuing to work with them on our initiatives, utilizing their skills for the benefit of the CSPA.

The primary focus of the IT Committee is to support the technical assets and resources of the CSPA and to advise the BoD and committees when required. We are always looking for ways to improve efficiency, functionality and the overall experience of our participants. With that said, if you have any suggestions on how we can better serve our participants, committees or organization as a whole, we would love to hear from you! At the end of the day, the CSPA is here to represent our participants and athletes, and if we can improve your experience through technology, we have accomplished our goal!

Looking Back, Moving Forward!

PREVIOUS ACCOMPLISHMENTS

Looking back over the past year, the IT Committee has completed a variety of initiatives to advance the CSPA's goals and values as well as supporting the organization's core systems. After reviewing last year's IT AGM report, I would like to update and highlight some of the accomplishments thus far:

- After extensive review of our current FileMaker association database, it has become increasingly clear that we will need to replace the current instance of our database with another option. We've engaged with a number of solutions providers and although we are still currently reviewing our options, it has become clear that we have three general paths forward:
  - Attempt to cleanup and upgrade our existing FileMaker database.
  - Redevelop our database in FileMaker.
  - Redevelop our database in a new SaaS (software as a service) platform.
- The IT Committee continues to act as a bridge between the National Office, committee members and our public website resources. When required, we post information updates to our Content Management System (Drupal) on behalf of other stakeholders or when appropriate delegate direct access. Backend maintenance is conducted on our CMS as well as other resources, such as the Moodle online training platform.
- We have been actively reviewing the existing internal technical documentation and have been completing updates both to our records and accounts when appropriate.
- The CSPA's InTime Judging Platform got around in 2017. Skyventure in Montreal requested the InTime platform for a national team selection even earlier in the year – this condensed meet went off well and we once again had the opportunity to tune in our processes and hardware. This past summer the CSPA Nationals were hosted by Parachutisme Nouvel Air (Farnham QC) and the InTime system was used extensively, recording scores in all disciplines. We also produced full VidCaps of video judged events and these are available on the CSPA website. Finally, Skyventure Montreal hosted the FAI World Indoor Skydiving Championships and requested the InTime system for use as their scoring platform. This was the most advanced utilization of our InTime platform. We were provided an unlimited license for the software, which allowed us to run two simultaneous FS / VFS panels all while artistic and dynamic scores were being fed into the system. VidCaps were once again produced of the meet, which were uploaded to the FAI / IPC results website. Overall I believe our capacity to efficiently utilize the platform is constantly evolving.
- Detailed statistics of our web page traffic for year ending 2017 is provided at the end of this report for your review.

LOOKING BACK, MOVING FORWARD!

GOALS AND INITATIVES FOR 2018

As we move forward to 2018, there are a number of initiatives that we will be undertaking. Obviously technology seems to change and advance quite rapidly and I fully expect our list to grow as the year progresses:

- We will continue to support the technological aspects of the National Office to ensure they are able to provide efficient services to members and participants.
- We will continue to evaluate and improve our internal SharePoint site, adding functionality when appropriate. All CSPA officers are now on Office 365 which should further facilitate the further use of this platform.
- The CSPA public website will continue to be reviewed to ensure it contains current and relevant data. Our public facing websites and applications are currently hosted on a dedicated virtual server, we will need to look at upgrading the core OS of this server in the next year. We are currently investigating the best path forward and will work with the National Office to minimize downtime / disruption during the process.
- We hope to move forward on an option to replace our current FileMaker database, either with a complete redeployment of the platform or development of a SaaS system. We are in the final stages of evaluating replacement options and hope to work with the National Office and BoD to determine the best path forward. Implementation of either option will take a number of months to a year to ensure all historical data is imported and functionality is tested.
- We have a new laptop to load the InTime Controller, InTime Server and Microsoft SQL onto. The hope is to use this workstation for shipping to smaller competitions, Judges Conferences and as a second panel for larger meets. This will be prepared for the 2018 Judges Conference in Vancouver – going forward it will be included in the InTime inventory.
- The InTime platform has been requested for use at the 2018 Canadian Indoor Skydiving Nationals at the new iFLY wind tunnel in Whitby, ON (April 2018).

In Summary

Despite some ongoing and longer term items that are currently being addressed, I believe that the overall state of the CSPA's information technology infrastructure is in good order. As always there is room for improvement and I look to you to advise how we can make your CSPA a greater asset! Thank you for taking the time to review this report. Should you have any questions, comments or concerns, please feel free to reach out! I look forward to working with you in the future…
